SUMMARY

The New Brunswick Department of Tourism, Recreation & Heritage presents the following statistical information concerning the province's forty-seven provincial parks. This report is based on camp area permits completed in the field, day use figures taken from traffic counters and actual on site monitoring. The factor used to ascertain the number of persons per vehicles is 2.6.

Opening dates for provincial parks vary from mid May to late June depending on user demand and local environmental conditions (see pages 36-38).

In 1986 Jardine Provincial Park was transferred to the municipality of Richibucto and in 1987 Beresford Provincial Park was transferred to the municipality of Beresford.

Of the forty-seven provincial parks operated in 1987 twenty-eight have overnight camping accommodations, the remaining nineteen are day use only; beach parks, picnic areas and scenic viewing areas. Of the aforementioned twenty-eight parks five are concessioned to private enterprise.

This report is basically an attendance analysis of our facilities. Fees, graphs, camper origins and facilities chart are also included.

New Brunswickers account for 46% of total camper attendance, other provinces 38% and the U.S.A. 16%.

A.P. Peterson
Executive Director
PROVINCIAL PARKS AND HISTORIC SITES

GLOSSARY OF TERMS

Average Occupancy Rate equals total number of permits in effect multiplied by 100% divided by unit capacity multiplied by number of nights permits available.

Campers - the number of permits sold multiplied by the length of stay multiplied by the average number per camping group. (- no. of campers nights).

Camping Group Nights equals cumulative total of permits issued per night for all units. (- total no. of campsites in use per night).

RESUME

Le ministère du Tourisme, Loisir et Patrimoine du Nouveau-Brunswick présente les statistiques suivantes concernant les quarante-sept parcs provinciaux. Ce rapport est basé sur le nombre de licences de camping délivrées sur le terrain, les données recueillies par les compteurs de trafic en ce qui a trait aux services de jour et le rassemblement de données sur les lieux. Le facteur utilisé pour calculer le nombre de personnes par véhicles est 2,6.

Les dates d'ouverture des parcs provinciaux varient de la mi-mai à la fin juin, selon la demande des utilisateurs et les conditions météorologiques de la région (se reporter aux pages 36 à 38).

En 1986, le parc provincial Jardine a été cédé à la municipalité de Richibouctou et en 1987, le parc provincial de Beresford a été cédé à la municipalité de Beresford.

Vingt-huite des quarante-sept parcs exploités en 1987 abritent un terrain de camping, tandis que les autres ne sont que des aires de loisir d'utilisation diurne, des parcs près d'une plage, des aires de pique-nique et des lieux d'observation. Cinq des vingt-huit parcs ci-dessus sont exploités par des particuliers.

Ce rapport est tout d'abord une analyse du taux de fréquentation de nos installations. Vous y trouverez des graphiques ainsi que des tableaux sur les droits d'entrée dans les parcs, l'origine des campeurs et les installations.

Au total, 46 p. 100 des campeurs viennent du Nouveau-Brunswick, 38 p. 100 des autres provinces et 16 p. 100 des Etats-Unis.

Le directeur exécutif des services locaux
A.P. Peterson

GLOSSAIRE

Taux d'occupation = nombre total de permis délivrés, multiplié par 100%, divisé par le nombre d'emplacements du terrain de camping, multiplié par le nombre de permis/nuitées disponibles.

Campeurs = le nombre de permis vendus, multiplié par la durée du séjour, multiplié par le nombre moyen de campeurs par groupe.
(- nombre total d'emplacements occupés par nuit).

Groupes de campeurs/nuitées = total cumulatif des permis délivrés par nuit pour tous les emplacements d'un terrain de camping.
(- nombre total d'emplacements occupés par nuit).
